An innovator who likes challenges and anything tech-inclined. Diligent and motivated in any IT related field. With 9 years of professional experience primarily in back-end development with a strong focus on server-side technologies and database architecture and management, complemented by proficient knowledge in front-end development frameworks and libraries.

PROFESSIONAL EXPERIENCE

Software Developer / IT Consultant

J. Williams Management Group Inc.

June 2015 - July 2024

Developed full-stack web applications and integrated desktop solutions for ERP, POS systems, and web APIs.

Experienced in server administration on Linux (CentOS) and cPanel, SEO tools, speed testing, administering cron jobs, and integrating software through APIs and third-party services, ensuring optimal application availability and performance.

Engineered a robust, web-based ERP system for the company, incorporating modules for HRIS, inventory management, accounting, files, payroll and implemented various automation applications for back-office operations, significantly enhancing overall productivity and operational efficiency.

Developed desktop applications using C#, including an NFC-based Smart Card system for secure employee access and various standalone software solutions for office use.

Programmer, Intern

Value-Focused Technology Solutions

November 2014 - May 2015

Trained in WebAPI and front-end web applications in ASP.NET MVC, WebAPI2 and Entity Framework on .NET platform with the help of Microsoft Virtual Academy (MVA). Gained experience in Visual Studio, ASP.NET, Android, VS Team Foundation Server, MSSQL, Git

EDUCATION

B.S. Information Technology

Lyceum of the Philippines University

Calamba City, Laguna

Class of 2015

Co-founded and served as the inaugural president of the university's first programming organization. Computer Programming Society (CPS) was established as a platform for IT and Computer Science students to collaborate and innovate collectively which provided opportunities for members to showcase their expertise in software development.
